## FILTER BAR

### SELECT YOUR BREWING METHOD

#### Syphon

##### Coffee from vapour pressure & vacuum

This brewing method been refined since the 1840s to produce a delicate cup of coffee. It's one of the coolest brew methods available.

#### Kalita Wave

##### Pour over coffee brewer from Japan

Flat bottom promotes even extraction while brewing. The slow spiral pour is key to finding sweet spots of each coffee.

#### Clever Dripper

##### Combination of pour over with immersion and stepping time

Produces a clean and full bodied cup of coffee.

#### V60

##### Pour over coffee brewer from Japan

They say the soul of the perfect coffee is in the brew, and the V60 dripper really does make a beautiful brew. V60 will produce a light-bodied, with clearer and delicate brew with high clarity of flavour than you would get with immersion techniques.

## COLD DRIP

90

### Brewed with ice water using cold drip tower method

Cold Drip + Water

Cold Drip + Milk

Cold Drip + Sparkling

## FILTER BAR

---

Coffee made by pouring hot water through crushed coffee beans in a coffee filter. Water seeps through the ground coffee, absorbing its oils and essences, solely under gravity, then passes through the bottom of the filter. The used coffee grounds are retained in the filter with the liquid falling (dripping) into a collecting vessel such as a carafe or pot.

## COFFEE BEANS SELECTION

### Java

100

The original and old farms in Ciwidey, West Java are still growing a good deal of one of the oldest, prized cultivars, Typica, known for producing a floral and flavorful cup.

Tasting Notes : Fruity, sweet, ripe cherry  
Region : Micro-region - Ciwidey,  
Java Sunda  
Elevation : Up to 1500 meters

Coffee Species : Arabica  
Coffee Cultivar : Ateng, Djember, Jember, Typica  
Processing : Natural

This is the oldest method of processing the coffee cherries. After being harvested, the whole coffee cherries are spread out on a drying racks without being pulped (separation of outer skins and beans), then the dried outer layers are removed.

### Sumatera

90

Tano batak literally means “Batak Lands” in the local tongue of North Sumatera. This coffee is very assertive in defining its identity. It creates a presence in your mouth like few others. Its big and bold presence is pronounced in its body. But the softness of plum acidity maintains the elegance of this coffee.

Tasting Notes : Dark chocolate and palm sugar  
Region : Dolok Sanggul - East Lake toba  
Elevation : 1400 -1600 meters

Coffee Species : Arabica  
Coffee Cultivar : Ateng, Djember, Timtim  
Processing : Wet hulled (giling basah)

Wet hulling technique refers to a part of the coffee process that is specific to Indonesia and creates a signature flavor. Wet-hulled coffees can have more body and lower acidity, but they also fall short of the sweetness and aroma uncovered by any methods.
