Water

“A Rock and a Hard Place” is harvested from a naturally flowing spring near the top of Mount Lofty.

This is an ancient aquifer and the water takes thousands of years to reach the surface. The water pushes up through the layers of sandstone which acts as a natural filter and results in this beautiful, clean water. The fact that this is a natural spring water as opposed to rainwater or purified water is what gives it a clean mouth feel and retains its natural mineral content.

Everything is done locally with as minimal environmental impact as possible.
