About Willow Stream Spa

Willow Stream Spas are acclaimed around the world for our focus on finding innovative ways to help guests discover their own energy. Energy makes the difference between living and living well; recharging our energy allows us to flow, rather than fight through life. That is why energy renewal is our mission.

Each of our spas are designed to reflect the beauty and ambience of its location and of the hotel in which it is located, so no two are alike. But all of our spas have this in common: they deliver an outstanding experience. Simply being here—away from the chaos of everyday life, relaxes our guests and starts them on their energy journey.

Our spa experiences combine authentic and effective treatments with a place for you to spend time alone or with your friends. Social spaces by the pool, relaxation lounges and steam rooms, yoga and fitness areas are all designed to stir our passion for living with abundant energy.

Our name: Willow Stream

We believe these two words reflect our philosophy and our connection to nature's elements.

Willow: The willow represents our deep-rooted authenticity, strong centre and flexible spirit.

Stream: The stream represents our energising journey through life-bending and changes in a peaceful, purposeful manner as it finds its way around obstacles.

Our logo

Our logo is composed of ancient symbols for the world's essential elements: earth, air, fire and water. The willow—wood—is the fifth element. Balancing these elements puts us in sync with nature's equilibrium

Hydrotherapy Wellness Experiences

Steam Room Wellness

Maintained at 42-45°C, the humid aromatic heat experience is highly beneficial for those who suffer from asthma and bronchitis as it opens up the breathing passages and alleviates congestion. We recommend that a session last 10-15 minutes and that you keep your body well hydrated afterwards. A humid environment is especially beneficial before or after a massage treatment to increase circulation.

Sauna Wellness

Maintained between 80-90°C, this dry heat soothes and warms the muscles, relieving tension from your body and minimising joint pain. This is especially beneficial for those who suffer from illnesses such as arthritis, migraines, and headaches, or as a way of warming down the body after an intense workout or treating the common cold. Dry heat is recommended for 10-15 minutes daily and it is important to ensure that your body is kept well hydrated afterwards.

Outdoor Swimming Pool

The outdoor pool is open to hotel guests and members as a private sanctuary to rest and relax. Bathed in natural light, the two free-form swimming pools are the ideal spot for rest and relaxation.
