There is a longstanding dispute about the origins of the hamburger: Germany or America? The debate is heated and endless, especially in these two countries. But in the end, what counts is not who invented the hamburger but how you like it! Apart from the traditional beef burger, there are countless variations with chicken or fish. There are even vegetarian versions! The rules have changed. Forget the traditional bun enclosing a patty of ground beef and salad vegetables covered in sauce. It's the state of mind that matters. And the quality, of course! This is why we source most of our ingredients from local suppliers and the meat we use comes exclusively from Australia. All to help the burger maintain its reputation as the favorite meal of every generation: fun, delicious and uncomplicated!
