## Unlocking the Gin Code

Not sure where to start? Don't worry—we've made navigating the gin world as easy (and fun) as sipping one. Each gin in this book has been decoded for your drinking pleasure. Here's how to read like a pro:

**Origin:** Where in the world your gin comes from—because place influences flavor.

**Type:** The gin category, such as London Dry, Flavoured, or Barrel-Aged.

**Style:** A quick feel for the gin's personality: is it bold, crisp, floral, or spicy?

**Taste Tags:** Fast flavor clues to help find your match (think: citrus, herbal, spicy).

**Botanicals:** The herbs, spices, fruits, or florals that give the gin its unique taste.

**Perfect Pairing:** The tonic water that complements the gin best, from our handpicked Franklin & Sons range.

**Garnish:** The final aromatic touch that brings the drink to life.
